MOTIVATION AND STRATEGY

The Copernicus Marine Environment Monitoring Service (CMEMS –marine.copernicus.eu) has been operational since May 2015.

The excellent CMEMS user response (+7000 subscribers today) is a real incentive to pursue and boost a strategy built on an open and free service and support to the development of downstream services. The CMEMS users and more specifically “intermediate users”, service providers themselves, are key to the success of the service. They bring an expert added-value to specialised markets to leverage the existing economic activity.

With the User Uptake, Mercator Ocean aims to reinforce its relationship with its intermediate users, to explain and enhance the CMEMS service and the services of these key players. This is based on their direct involvement to ease the CMEMS use and promote inspiring exemplary cases which will contribute to the development of the whole chain.

In practice, Mercator Ocean wishes to identify the successful elements of the service relationship between CMEMS and its users, to display and bring visibility to the services of its users and on CMEMS. The illustration with concrete examples will raise interest of new users and allow communities to exchange on a specific topic and propose relevant evolutions to the current European service.

This User Uptake component will accompany CMEMS during all its operations and evolutions and will take the shape of several successive markets. For this first wave, a thematic priority is been set on the coastal area. Other themes will be addressed during the following stages to continue answering user needs.

CONTEXT

A Delegation Agreement has been signed between the European Commission and Mercator Ocean for the Copernicus Marine Environment Monitoring Service (CMEMS) implementation. The Copernicus Marine Service provides regular and systematic reference information on the physical state and dynamics of the ocean and marine ecosystems for the global ocean and the European regional seas. This capacity encompasses the description of the current situation (analysis), the prediction of the situation a few days ahead (forecast), and the provision of consistent retrospective data records for recent years (re-analysis).

CMEMS provides a sustainable response to European user needs in four areas of benefits that are :

- coastal and marine environment,
- maritime safety,
- marine resources,
- climate, seasonal and weather forecasting.
-

The areas of benefits and their sub-categories are listed in the CMEMS registration form, paragraph 2.2 (<http://marine.copernicus.eu/web/56-user-registration-form.php>)

The delegation agreement between the European Commission and Mercator Ocean requires the development and the implementation of a User Uptake strategy to firstly secure the loyalty of its users and secondly to attract new user communities. This component is complementary to the long term “service evolution” which allows for R&D evolutions according to users’ needs and applications. These two components feed the CMEMS service by proposing evolution and innovation both on the upstream and downstream aspects that can then be an integral part of the service.

The first User Uptake tenders focus on demonstrations of coastal and operational downstream CMEMS services, including those linked to the EU Marine Strategy Framework Directive (www.msfd.eu) and an inventory of mobile application that use CMEMS products.

Forthcoming User Uptake tenders will require other demonstrations of coastal and open sea downstream services targeting geographical domains and areas of benefits not provided for in previous tenders, as well as tool development, always taking into account user needs.

CMEMS will mention the names of the organisations at the origin of the demonstrations or the tools, purchased by Mercator Ocean, which will be displayed on its own website in different pages, including the one that will be created to increase the visibility of the chosen services, tools and applications, object of the User Uptake tenders.

- Candidates shall supply a complete file comprising all the documents stipulated by article 3.4 and in the formal conditions indicated therein.

3.2. Subcontracting and consortia

3.2.1. Subcontracting

Candidates may subcontract performance of certain parts of the contract, subject to complying strictly with the provisions of Law n°75-1334 of 31 December 1975 relating to subcontracting. Each subcontractor, as well as its terms and conditions of payment, shall be accepted by Mercator Ocean in the conditions set out under article 134 of Decree n°2016-360 of 25 March 2016.

In the event of intending to justify their financial, technical and professional capacity for performing this contract for which they are submitting their application via the capacities of one or several subcontractors, candidates shall submit their file in the terms and conditions set out in article 3.4.1 of these consultation regulations.

If they do not consider it necessary to avail themselves of the financial, technical or professional capacity of one or several subcontractors but envisage, on remittal of the bid, subcontracting services within the scope of this contract for which application is presented, candidates shall present their bid file in the terms and conditions stipulated under article 3.4.2 herein.

3.2.2. *Ad hoc consortia of economic operators*

Subject to rules on the freedom of prices and competition, candidates may present their application and bid in the form of an ad hoc consortium of economic operators, in the terms and conditions set out in article 45 of Decree n°2016-360 of 25 March 2016.

The consortium has joint-and-several liability when each of the members is financially committed for the whole of the contract. The consortium has joint-liability-only when each of the members of the consortium undertakes to perform services which may be awarded to him within the scope of this contract.

Candidates may present their application and bid in the form of a joint-liability-only or a joint-and-several liability consortium. If the contract is awarded to a consortium that presented its application and bid in the form of a joint-liability-only consortium, transforming the said consortium into a joint-and-several liability consortium is nevertheless required under the terms and conditions stipulated in the SCC.

Designated in the deed of commitment of consortium members, the consortium representative represents all members with regard to MERCATOR OCEAN and co-ordinates their services throughout the entire duration of the contract.

Candidates' attention is drawn to the fact that the same economic operator may not be representative of more than one consortium that is candidate for the consultation. Candidates' attention is also drawn to the fact that, within the scope of this consultation, the same economic operator is not authorized to remit several applications in his capacity as member of a consortium and individual candidate.

The make-up of a consortium may only be modified between the date of remittal of the bids and the date of signature of the contract for which the consortium is candidate, if the consortium can prove that one of its members is being wound up by the court or that it is impossible for him to accomplish his task for reasons which are beyond his control. In such case, the consortium may request MERCATOR OCEAN authorisation to continue participating in the consultation without the defaulting operator, by proposing if needs be one or several subcontractors to be approved by MERCATOR OCEAN.

MERCATOR OCEAN shall decide on such request after examining the financial, technical and professional capacity of all consortium members thus transformed and of any subcontractors presented for its acceptance.

3.3. Remitting the file

The candidate may remit his bid electronically or via surface mail in line with methods set out in article 3.6. All documents of the file shall be provided by the same mean (digital or paper).

The file remitted by the candidate will take the form of a file identified as **Marché (Contract) 34-UU-DO-CMEMS-INV1**.

The file comprises several parts: several electronic sub-files or several envelopes for the paper versions.

In order to be complete, the candidate's file must necessarily include:

- One part per lot for which a bid is submitted "part n°2 bid – **Marché 34-UU-DO-CMEMS**, bearing the candidate's name,

3.4. Documents required in each sub-file

The candidate's file shall contain documents listed hereafter, in digital or paper format in one copy, except for the Deed of Commitment of which two original copies are required.

If the candidate chooses a paper version, these documents will also be supplied on an electronic support (one support per envelope: USB stick or CD Rom). In the event of any differences between electronic and paper supports, those on the paper support shall be binding.

3.4.1. Sub-file "part n°1 – Application" (1 copy)

The "part n°1 – application" sub-file/envelope contains elements for judging the admissibility of the candidate and assessing his professional, technical and financial capacities.
