

Project manager - digital innovation for operational oceanography – M/W

Fixed-term contract for a defined purpose (up to 36months)- Full time

How to apply :

Send your cover letter and detailed resume with the following reference 2022-08/OO/EDITO to recruitment@mercator-ocean.fr

Deadline for applications: 16/09/2022

Date of publication : 09/08/2022

Date of taking up the post : 4th quarter of 2022

About the job :

You will join Mercator Ocean's Operational Oceanography department to support the department manager in the scientific and technical coordination of the EDITO Model Lab project aimed at developing the new digital models of the future European Ocean's Digital Twin.

In this context, you will be in charge of :

- The operational management of the EDITO Model Lab project entrusted to Mercator Ocean by the European Commission
- Ensuring that the scientific, technical, schedule and financial objectives are met
- Develop and maintain relations with the European partners of the project (consortium, European Commission)
- Organise internal operations (project meetings, communication, etc.)
- Organise the reporting of activities to the European Commission and support the Department manager in his relations with the Commission

Assets for success:

You have a Master's degree or equivalent with experience in project management in a scientific context.

You are willing to work in a team on ambitious and innovative scientific and technical projects. You are particularly rigorous and organised, you are curious, dynamic and reactive.

We are looking for candidates :

- Knowledge of and mastering in project management tools
- With experience in research and/or European project management.
- Have good writing and synthesis skills
- Fluent in written and spoken English

Knowledge of the fundamentals of oceanography and the context of operational oceanography would be appreciated.

Who are we?

Mercator Ocean International has been developing operational oceanography activities for nearly 25 years, as part of its public interest mission to preserve the ocean.

Many scientific and societal challenges must be met to ensure a sustainable ocean, whether they concern the environment, biodiversity, climate change, the blue economy or education. To meet these challenges, Mercator Ocean designs, develops, operates and maintains state-of-the-art digital systems capable of describing, analysing and forecasting the state of the ocean in 3D, continuously and in real time. The scientific information is then translated to be accessible to all, whether they are public or commercial services, political decision makers, industrialists, associations, NGOs, teachers or citizens. Mercator Ocean International thus combines scientific excellence and social commitment on a daily basis.

As a non-profit company under multinational governance (ES, FR, GB, IT, NO), we work in a climate of trust with our ten shareholder partners, all key players in the development of European oceanography.
